DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Onishi (US 5,708,284).

With regard to claims 1-4, Onishi discloses a non-volatile random access memory (col. 5, line 30 to col. 11, line 7 and fig. 6) comprising:

- An insulation film 7 having a concave portion at a top surface;
- A laminated body obtained by laminating a plurality of layers on the top surface and etching a region of the plurality of layers corresponding to a region other than

ferroelectric layer 9 formed on the lower electrode 8 and an upper electrode layer 10 formed on the ferroelectric layer 9, where a portion of the lower electrode layer 8 protrude outward from an inner peripheral edge forming the concave portion, and a side of the portion of the lower electrode layer 8, a side of the ferroelectric layer 9 and a side of the upper electrode layer 10 are flush with each other (fig. 6);

- A film 8a formed in a bottom of the hollow and separating between the insulating film 7 and the lower electrode layer 8b (fig. 6);
- The lower electrode layer 8 includes a first electrode portion 8a formed at the corner of the hollow and a second electrode portion 8b formed on the first electrode portion 8a (fig. 6);

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Onishi (US 5,708,284) in view of Hamagasaki (US 5,767,541).

the insulating film are planarized flush with each other. However, Hamagasaki discloses the

Art Unit: 2814

lower electrode is planarized flush with the insulating film (Hanagasaki fig. 1E). Hanagasaki teaches planarization could remove surface irregularity (Hanagasaki col. 7, line 37). Therefore, it would have been obvious to one with ordinary skill in the art to planarize the top surface of lower electrode flush with the insulating film in order to remove the surface irregularity.

Response to Arguments

Applicant's arguments filed 8/13/02 have been fully considered but they are not persuasive.

- Reference Aoki et al. is no longer used in this office action. The argument is moot.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

.Art Unit: 2814

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
